## Experience

---

### Invizio Solutions LLP | Frontend Developer

August 2022 - Present

- **UI Enhancement:** Revamped the Diva web app's interface for a modernized look and improved user experience by 50%.
- **Catalogue Link Feature:** Created a feature enabling users to selectively share designs while ensuring access control for authorized individuals, which increased sales by 40%.
- **Dynamic Form Development:** Engineered a dynamic form module, allowing users to personalize design creation by customizing fields based on their preferences. This feature increased sales by 120% and customer retention by 20%.
- **Auto-Calculation Function:** Implemented an auto-calculation feature within the dynamic form, facilitating instant value updates based on user-defined formulas.
- **Bulk Image Upload Optimization:** Resolved API call stalls in the bulk image upload by implementing batched API calls and integrating image compression for faster data transmission.
